Implementing the health-related Sustainable Development Goals

Rio de Janeiro
Nov 7th 2016
SDGs: a universal, transformative framework for people, planet and prosperity
But 3 more “Ps” will also be important:

- Policy
- Power relations
- Purpose
Enablers in achieving the Goals

- Quality research
- Evidence based policies
- Intersectoral approaches
- Monitoring systems to track progress and support accountability
- Collaboration and collective action
Knowledge Generation

Policy Research Institutions

Engage in National and Global Policy Debates
Inform and track systems and policies
Consultations with policy research institutions

SDG implementation at national, regional and global level

The roles played and the spaces occupied by policy research institutions

How best to enable the efforts of policy research institutions?
